About me

I'm a dynamic Geographic Information Systems (GIS) and Risk Management professional with strong academic and practical expertise in spatial analysis, geographic data management, and risk assessment. I'm proficient in ESRI softwares and developing strategic solutions for territorial planning. I excel in risk modelling and environmental impact assessment..

I believe I have a solid foundation in data-driven decision-making and a passion for leveraging GIS in safety and planning contexts, being adept at delivering

Software Skills

Professional Experience

Hydraulic Modeller – Department of Hydraulics and Natural Hazards (April 2026 – present) Funchal, Madeira

Regional Lab. Civil Engineering – Irec.pt

- Hydrological and hydraulic modelling of Madeira's stream systems using HEC-HMS and HEC-RAS.
- Support flood hazard analysis and risk assessment through scenario-based flood simulations.
- Initial application of the SWAN, MIKE21 & SFINC's model (Deltares) to investigate coastal hydrodynamic behaviour and its interaction with fluvial processes.

GIS Analyst – Department of Port Operations and Security (ago-out) 2024 [*Internship*] Funchal, Madeira

Port Administration of Madeira, S.A. - apram.pt

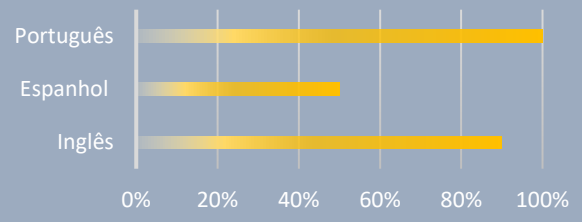

- Preparation of a Preliminary Intervention Plan for *safety & security;*
- Integration of Esri Software in Port of Funchal operations

Intern – Civil Protection Department (01 ago-31ago) 2022 [Uni. *Internship*] Porto Santo, Madeira

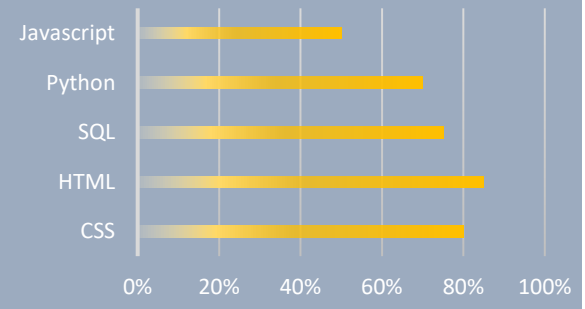

Porto Santo City Hall - cmps.pt

- Topographical survey of buildings in the municipality;
- Emergency Plan for a local event

Language Skills

Programming Skills

Adicional Info.

Drivers license A1/ B/ B1

Volunteering

Volunteer Firefighter

(jul-ago) 2019 Porto Santo, Madeira

Volunteers firefighters of Porto Santo - bvps.pt

Education

Master's – Geograpgic Information Systems and Territorial Planning (set 2023 – Present) Porto, Portugal

Faculdade de Science – University do Porto – sigarra.fcup.pt

- Spatial analysis, geographic data management, and the development of solutions for land-use planning;

- Integration of new software and its application to risk management.

Bachelor's Degree – Civil Protection and Risk Management (set 2019 – jul 2023) Ponta Delgada, Açores

Faculty of Science and Technology – University of Azores – fct.uac.pt

- Spatial analysis, geographic data management and development of solutions for territorial planning;

- Integration of ESRI software and application to risk management.

Isolated Unit – Ecotoxicology

- Risk assessment and mitigation;

- Coordination in an emergency context with an emphasis on strategic planning and collaboration with security organisations.

Erasmus+ (Jan 2022 - jul2022) Reykjavík, Islândia

Faculty of Engineering and Earth Sciences – Háskóli Íslands - hi.is

- Remote Sensing and Geographical Information Systems
- Geochemistry
- Glacial Geology

Certificates

Hydraulic Modelling with HEC-RAS - Hydrological Engineering Center

United Nations Educational Scientific & Cultural Organization
Credential code: f33ec2c5947c4045a5f56e6fd0258974

FloodAdapt for Flood Risk and Adaptive Planning - Deltares

United Nations Educational Scientific & Cultural Organization
Credential code: a4eb4f3a593744168d845ba12c2b6cf2

Ambulance Care Assistant - PTS (01 ago- 31 ago) 2019

Rapid Intervention Medical Team – EMIR – procivmadeira.pt Porto Santo, Madeira

Basic Life Support with Automatic External Defibrillation – BLS/AED (01 ago- 31 ago) 2019

Rapid Intervention Medical Team – EMIR – procivmadeira.pt Porto Santo, Madeira
